ROSS
Measuring &
Hand Tools

HISTORY: Mitco Tool Company was established in 1964 as the manufacturing arm of Bonuskor Group and the main product line was high speed steel drill bits. The plant was originally designed to manufacture 6000 drills per day. By 1982 the capacity of the Mitco drill plant was in the excess of 80 000 units per day. The company distributed its products to more than 40 countries in the world.

Mitco diversified its product range to manufacture a range of hand tools which included bench vices, hacksaw frames, cold chisels, screwdrivers, die sets and machine tools.

In the mid 1990's Mitco bought a company called Afile which manufactured a range of engineers files and wood rasps and a range of iron tools under the Aftool brand name, and the company's name was changed to Afmit (Pty) Ltd. In 2010 the name was changed back to Mitco (Pty) Ltd. In 2013 the company acquired Rosslyn Technical Products which distributes a range of hand tools under the Ross brand name and in 2016 were appointed the sales and marketing agents for Wera screwdrivers and hand tools as well as the Sievert range of heating tools & gas.

The company is situated in the Brits Industrial Area from where it manufactures and distributes its range of products and has offices in Johannesburg and Durban.

POINT GRINDING OF TWIST DRILLS

A large percentage of drill failures can be directly attributed to improper point grinding. It is most important therefore that great care be exercised when re-grinding drill points. The following diagrams illustrate proper grinding.

This drill is properly ground. Lip angles and lengths are equal, resulting in a central chisel. The chisel angle and lip relief are correct.

SPEEDS AND FEEDS FOR DRILLING

		Work Material							
		Stainless Steel	Tool Steel	Cast Iron	Malleable Iron	Medium Carbon Steel	Free Cutting Steel	Alum. Brass	Wood Plastic
		Cutting Speed: Metres per minute							
		12	18	24	27	30	43	61	91
		Cutting Speed: Feet per minute							
		40	60	80	90	100	140	200	300
Drill Diameter		Spindle Speed RPM							
(mm)	(inch)								
1.5	1/16	2445	3667	4889	5500	6112	8556	12223	18335

13	1/2	306	458	611	688	764	1070	1528	2292

Recommended Feeds for Various Drill Diameters

Diameter of Drill		Feed per Revolution	
(mm)	(inch)	(mm)	(inch)
3	1/8	0.02 - 0.10	0.001 - 0.003
6	1/4	0.05 - 0.15	0.002 - 0.006
13	1/2	0.10 - 0.25	0.004 - 0.010
25	1	0.20 - 0.40	0.007 - 0.015
> 25	> 1	0.40 - 0.65	0.015 - 0.025

Note: The information on this page is intended as a general guide only. Figures will vary with grades of material used.

It is best to start with a moderate speed and feed, increasing either one, or both, after observing the cutting action and condition of the drill bit.

FILE STAND CONCEPT

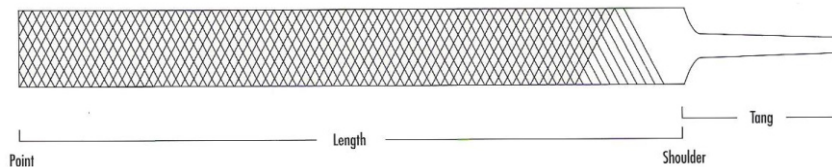

File Stand

Quality Policy

1. We are an organisation committed to excellence and the quality of our products is important for our continued success. To sustain this objective, we are committed to comply with and continually improve the effectiveness of our Quality Management System.
2. We are committed to provide a consistently good quality product to our customers and enhance customer satisfaction by ensuring good manufacturing practices, good customer practices and good marketing practices.
3. We are committed to our belief that the continual improvement in the quality of our products and services shall make us more competitive and provide our customers the best value for money.
4. All files and rasps are manufactured to SABS Specification SANS 1172/SABS 1172/1977 and carry the SABS mark.

The File Length

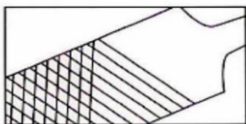

The Shape of the File

The shape of the file is determined by the shape of the workpiece. There is a file for every type of work.

Flat	Half Round	Round	Square	Three Square

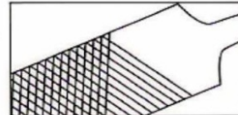

The Cut Coarseness

The cut coarseness is determined by the job at hand. The number of teeth per centimeter indicates the coarseness.

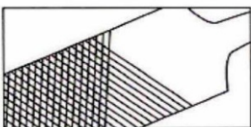

Bastard Cut File

For fast stock removal on hardened steel and cast iron. Less teeth per centimeter and good teeth depth.

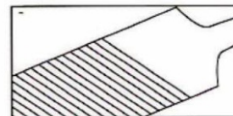

Second Cut File

All purpose file to obtain reasonable stock removal and finish.

Smooth Cut File

More teeth per centimeter to enable a smooth finish even on hardened material.

Single Cut File

For fine filing and sharpening on hardened steel.
